ADDRESSES OF MARINE ACCIDENT INVESTIGATION AUTHORITIES

PREFACE

15th April, 2025

This Operational Safety Technical Information Circular (CITSO) constitutes a technical document intended to disclose the addresses of the Maritime Accident Investigation Authorities in use at the National Institute for Transport Accident Investigation and Prevention (INIPAT). This circular was produced to assist and provide the necessary information to maritime accident investigators and works in INIPAT, regarding the addresses of the Maritime Accident Investigation Authorities.

All maritime accident investigators and employees designated to use the information contained in this circular must pay due attention to the correct coordinates of the addresses under consideration, in order to avoid any mistakes that may arise when providing information necessary within the scope of information exchange activities.

If there is any technical guide in conflict with this circular, the INIPAT Management must be notified in writing, in order to take decisions deemed relevant on the matter. INIPAT's goal is to produce technical documents, which empower maritime accident investigators, when carrying out tasks within the scope of using the addresses of Maritime Accident Investigation Authorities.

This circular will be treated as a dynamic document subject to revisions, depending on amendments to Angolan aeronautical legislation and updates to the standards and recommended practices of the International Maritime Organization (IMO) on operational safety, with particularity those contained in Resolution MSC 255 (84) Code of International Standards and Recommended Practices for a Safety Investigation of a Maritime Accident or Maritime Incident (Code of Investigation of Accidents) and the global integrated ship information system (GISIS – Global Integrated Shipping Information System), with the INIPAT Management responsible for its regular updating.

Finally, it is important to highlight that all recipients and users of this technical operational safety information circular are invited to submit information or proposals considered relevant for the adaptation and updating of this circular.

Approved by:

Luís António Solo
Director General of INIPAT

INTRODUCTION

If there is a need to establish requirements for the design and maintenance of the list of addresses of Maritime Accident Investigation Authorities under the responsibility of the Angolan State;

Considering the need to comply with the standards and practices recommended by the International Maritime Organization (IMO) contained in Resolution MSC 255 (84) - Code of International Standards and Recommended Practices for a Safety Investigation of a Maritime Accident or Maritime Incident (Accident Investigation Code), which requires member States to maintain detailed contact details and addresses of Maritime Accident Investigation Authorities, for immediate use whenever necessary;

Taking into account that the Organic Statute of INIPAT establishes the obligation to comply with the standards and recommendations of the IMO, of which the Angolan State is a full member;

In accordance with the normative provisions referenced above, the National Institute for Transport Accident Investigation and Prevention determines the following:

Article 1 (Object)

This Operational Safety Technical Information Circular aims to establish the requirements of the Republic of Angola, regarding compliance with the design and maintenance requirements of detailed contacts and addresses of the Maritime Accident Investigation Authorities, to be used by maritime accident investigators and INIPAT employees, during interaction activities with the same authorities.

Artigo 2º(Âmbito)

This Circular is mandatory for maritime accident investigators who act on behalf of the National Institute for Research and Prevention of Transport Accidents (INIPAT) in the processes of interaction with similar INIPAT Authorities.

Article 3

(from the Maritime Accident Investigation Authorities mailing list)

1. The List of Addresses of Maritime Accident Investigation Authorities contains the location coordinates of the Authorities in question.
2. The List in reference must be updated periodically, whenever necessary, by the Department of Prevention, Studies and Information Technologies of INIPAT.

Article 4

(Final Provisions)

1. Cases not provided for in this Circular of Technical Information on Operational Safety will be
